## **Discussion:**

**Child & Family:** We finalized, reviewed & updated our power point. We are working with Launch on a poster to go into pediatricians' offices to shine on Recovery & Resiliency.

**Public Awareness:** The video almost complete. We found a new addition which is a young man who adds a different dynamic. This gentleman will be filmed Oct. 15. We are looking to see how we can distribute the video. We're looking for a big roll out in the Spring. We have a 14 minute preview of the video already. We are trying to find what role AGH will play.

Also, Thank you for submissions on the WIN. We need more submissions & suggestions.

**QI:** The Recovery Walk was a success. That has been our life lately. Looking to how to utilize this final product.

**Education:** We are still nearing the completion of the reshaping of our Recovery 101 which was grown out of our committee though it is currently being used by the DHS. We are just trying to meet all demands and requests. We are looking at a few other project requests and collaborations.

**Collaborative for Recovery Dialogue:** No one present.
